INTRODUCTION

This special report, compiled from records of the 1961 and 1956 Censuses, shows the population totals of unincorporated villages and settlements with a population of 50 persons or more at the 1961 Census. Further, their locations as to municipality and county or census division, are indicated for each entry.

Population totals are issued in the regular series of census reports for organized municipalities in each province, such as townships, parishes, municipal districts, as well as for all incorporated cities, towns and villages. (See reports 1.1-1 to 1.1-6 inclusive, and 1.1-10 of the Volume I Series.) Individual totals are not shown, however, for unincorporated villages and settlements in the foregoing reports since they do not have any legal or official boundaries. Nor is it always possible to distinguish their populations separately within the general locality in which they are situated.

Despite these recognized difficulties, census enumerators are instructed to indicate separately on their records all households concentrated within a locally recognized settlement. The degree of success achieved in this procedure has varied from area to area. For example, post office addresses are sometimes confused with the actual locations of dwellings, making it difficult to determine the exact number of persons to be ascribed to the village or settlement as distinct from the surrounding area.

For such reasons as the above, the population totals shown in this report for 1956 and 1961 should be considered as approximations. Where corresponding figures are not available for 1956, this has been indicated by a footnote. In the majority of such instances this would mean that the particular locality was not separately identified in the enumerator's records, or was possibly not recognized as a settlement or village at the earlier census. In certain other instances, particularly in Newfoundland, some settlements shown separately in 1956 were grouped to give a comparative figure with the 1961 Census.

Ce rapport spécial, fondé sur les résultats des recensements de 1961 et de 1956, donne la population des villages et établissements non constitués et comptant 50 habitants ou plus lors du recensement de 1961. De plus, la situation dans la municipalité ou le comté ou division de recensement est indiquée pour chacun de ces endroits.

Les chiffres de la population sont publiés dans la série régulière des rapports du recensement pour les municipalités organisées dans chaque province, telles que townships ou cantons, paroisses, districts municipaux, de même que pour toutes les cités et villes et tous les villages constitués. (Voir rapports 1.1-1 à 1.1-6 inclus et 1.1-10 de la série du 1er volume.) Dans ces rapports, toutefois, les chiffres relatifs aux villages et établissements non constitués ne sont pas donnés parce que ceux-ci n'ont pas de limites juridiques ou officielles. Il n'est pas toujours possible d'en distinguer la population de celle de l'ensemble de la localité dans laquelle ils sont situés.

En dépit de ces difficultés évidentes, les agents recenseurs devaient consigner distinctement sur leurs formules tous les ménages concentrés dans un établissement reconnu localement. Le degré de succès de cette méthode a varié d'une région à l'autre. Les adresses postales, par exemple, étant parfois confondues avec l'emplacement réel des logements, il est difficile de déterminer le nombre exact de personnes à attribuer au village ou à l'établissement distinctement de la région environnante.

C'est pourquoi les chiffres de la population contenus dans le présent rapport pour 1956 et 1961, ne doivent être tenus que pour des approximations. Là où les chiffres correspondants pour 1956 ne sont pas disponibles, un renvoi l'indique. Dans la plupart de ces cas, cela signifie que l'agent recenseur n'a pas identifié distinctement la localité en particulier sur ses formules ou que la localité n'a peut-être pas été reconnue comme établissement ou village au recensement précédent. Dans certains autres cas, à Terre-Neuve, en particulier, certains établissements indiqués distinctement en 1956, ont été groupés de façon à donner un chiffre comparable à celui du recensement de 1961.
